

# Commercial Marine Pumps and Systems

## Pumps and Packaged Systems for Commercial Marine Applications and Heavy Industries

- Engine Room Pumps
- National Defense
- Pump Outs
- Shipbuilders
- Shipyards
- Yacht/Ship Refinishing

# Introduction

## Battlefield Tested for Commercial Marine Applications Your Applications Are Diverse, So Are Wastecorp Pumps.

Wastecorp's commercial marine pump division serves the needs of cruise ship operators, shipbuilders, dry dock services companies, oil rigs, University marine biology research departments, yacht builders and worldwide Naval defense agencies. From engine room booster, circulation and seawater transfer pumps to pump out and bilge pumping services, Wastecorp is your full service OEM commercial marine pump manufacturer.

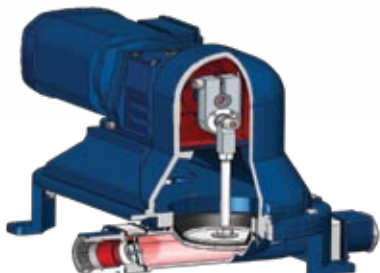

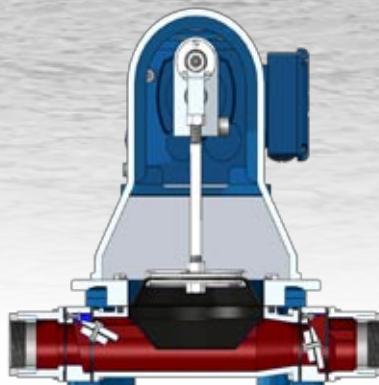

### More Choice At Wastecorp Pumps

Wastecorp can help you customize your pump with components that are designed for the long haul which

maximizes your budget. This includes our award winning Mud Sucker Pump brand with a choice off over 100 diaphragm pump models for severe duty pumping. Contact a Wastecorp engineering support representative for more information at **1-888-829-2783** or **+1-201-445 2882** worldwide.

### Heavy Duty Internals

If you're like many commercial marine customers, you're looking for a pump system that can outlast the punishing conditions of your application. Unlike most makes, Wastecorp Pumps feature heavy duty internals that can withstand severe duty applications.

### Innovation Built-in

Wastecorp's innovative flex production floor enables you to select specific components designed for your application with reduced wait times for specialty pump products. Get the pump you need without the wait.

# Commercial Marine Pump Products

## Waste Tank Pump Systems

For temporary bilge and waste transfer services into a container, Wastecorp's marine waste tank systems are available in a variety of configurations.

- Select up to 2000 gallon translucent polyethylene, stainless steel, or steel tanks
- Heavy duty Mud Sucker 2FA Series pump systems
- Crush proof hosing

## High Volume Centrifugal Pumps

Turbo Flow high volume pumps are offered in split case, circulation/booster and end suction pump models. Designed for marine ballast, seawater cooling pumps, fresh water cooling pumps, circulation applications and more.

- Fluid transfer capabilities up to 60,000 GPM
- Various materials of construction available
- Heavy duty pump design

## Customers Say...

“We work the heck out of the Mud Sucker 3FA-Series with our advanced hull blasting process. We've used other pumps but our Mud Sucker 3FA-EC works better.”

**Detyens Shipyards -  
Charleston, South Carolina**
