

## Mud-Sucker 3B-W-M™/ 4B-W-M™ Series

### Overview

The 3B-W™ and 4B-W™ heavy-duty walking-beam series are manufactured of cast iron components, thermoplastic elastomer diaphragm, urethane ball valves with steel core, urethane, cast iron, bronze or stainless steel valve seats, and includes heavy gauge steel to industry standards for pumping heavy viscous, slurry materials and including debris laden liquid. The 3" unit can pump at full capacity up to 80 GPM, without adjustment or speed variations. The 4" unit can pump up to 110 GPM, without adjustment or speed variations.

### General Specifications

Model	3B-W-M/ 4B-W-M
Conn. Size	3"/ 4"
U.S. GPM	80/ 110
<b>Suction</b>	
Vert. (ft)	25
Horiz. (ft)	100
<b>Discharge</b>	
Vert. (ft)	50
Horiz. (ft)	500
Diap. Style	Simplex
Wet Sec. Style	Ball Valve
Standard Drive	6.5HP Engine with Gear Reducer 10 HP engines available
Base Options	Stationary/Trailer Mounted

Better pumps with cleaner engines.  
Less environmental impact.  
That's a Wastecorp pump.
